Makmur Sentosa**
Furniture and Wooden House

Company Profile

since 1998

About us

MUGIHARJO has been established since 1998 in Boyolali, Central Java, Indonesia. Starts from the home industry which begins from the enthusiasm of young men, who want to make furniture in better quality.

In 2005 we received a large market demand so we built a factory named PT YOSOĞIRA which is located in an industrial area managed by Asmino (Indonesia Furniture Industry and Handicraft Association), precisely in Kalijambe, Sragen Regency.

After we experienced a difficult situation related to the global economic situation in Europe, in 2013 we decided to re-manage PT YOSOĞIRA and changed the name to PT ANUGRAH RIMBA NUSANTARA and PT MUGIHARJO MAKMUR SENTOSA.

We have had a long experience competing in the production of furniture and wooden houses. We also have a good market in Europe, Middle East, South Asia, East Asia, Australia, America and Africa. We have learned the market for decades, as well as the timber ecosystem from upstream to downstream. So MUGIHARJO is committed and working with wood farmers from all over Indonesia to preserve the environment, for that we only use legal wood for production.

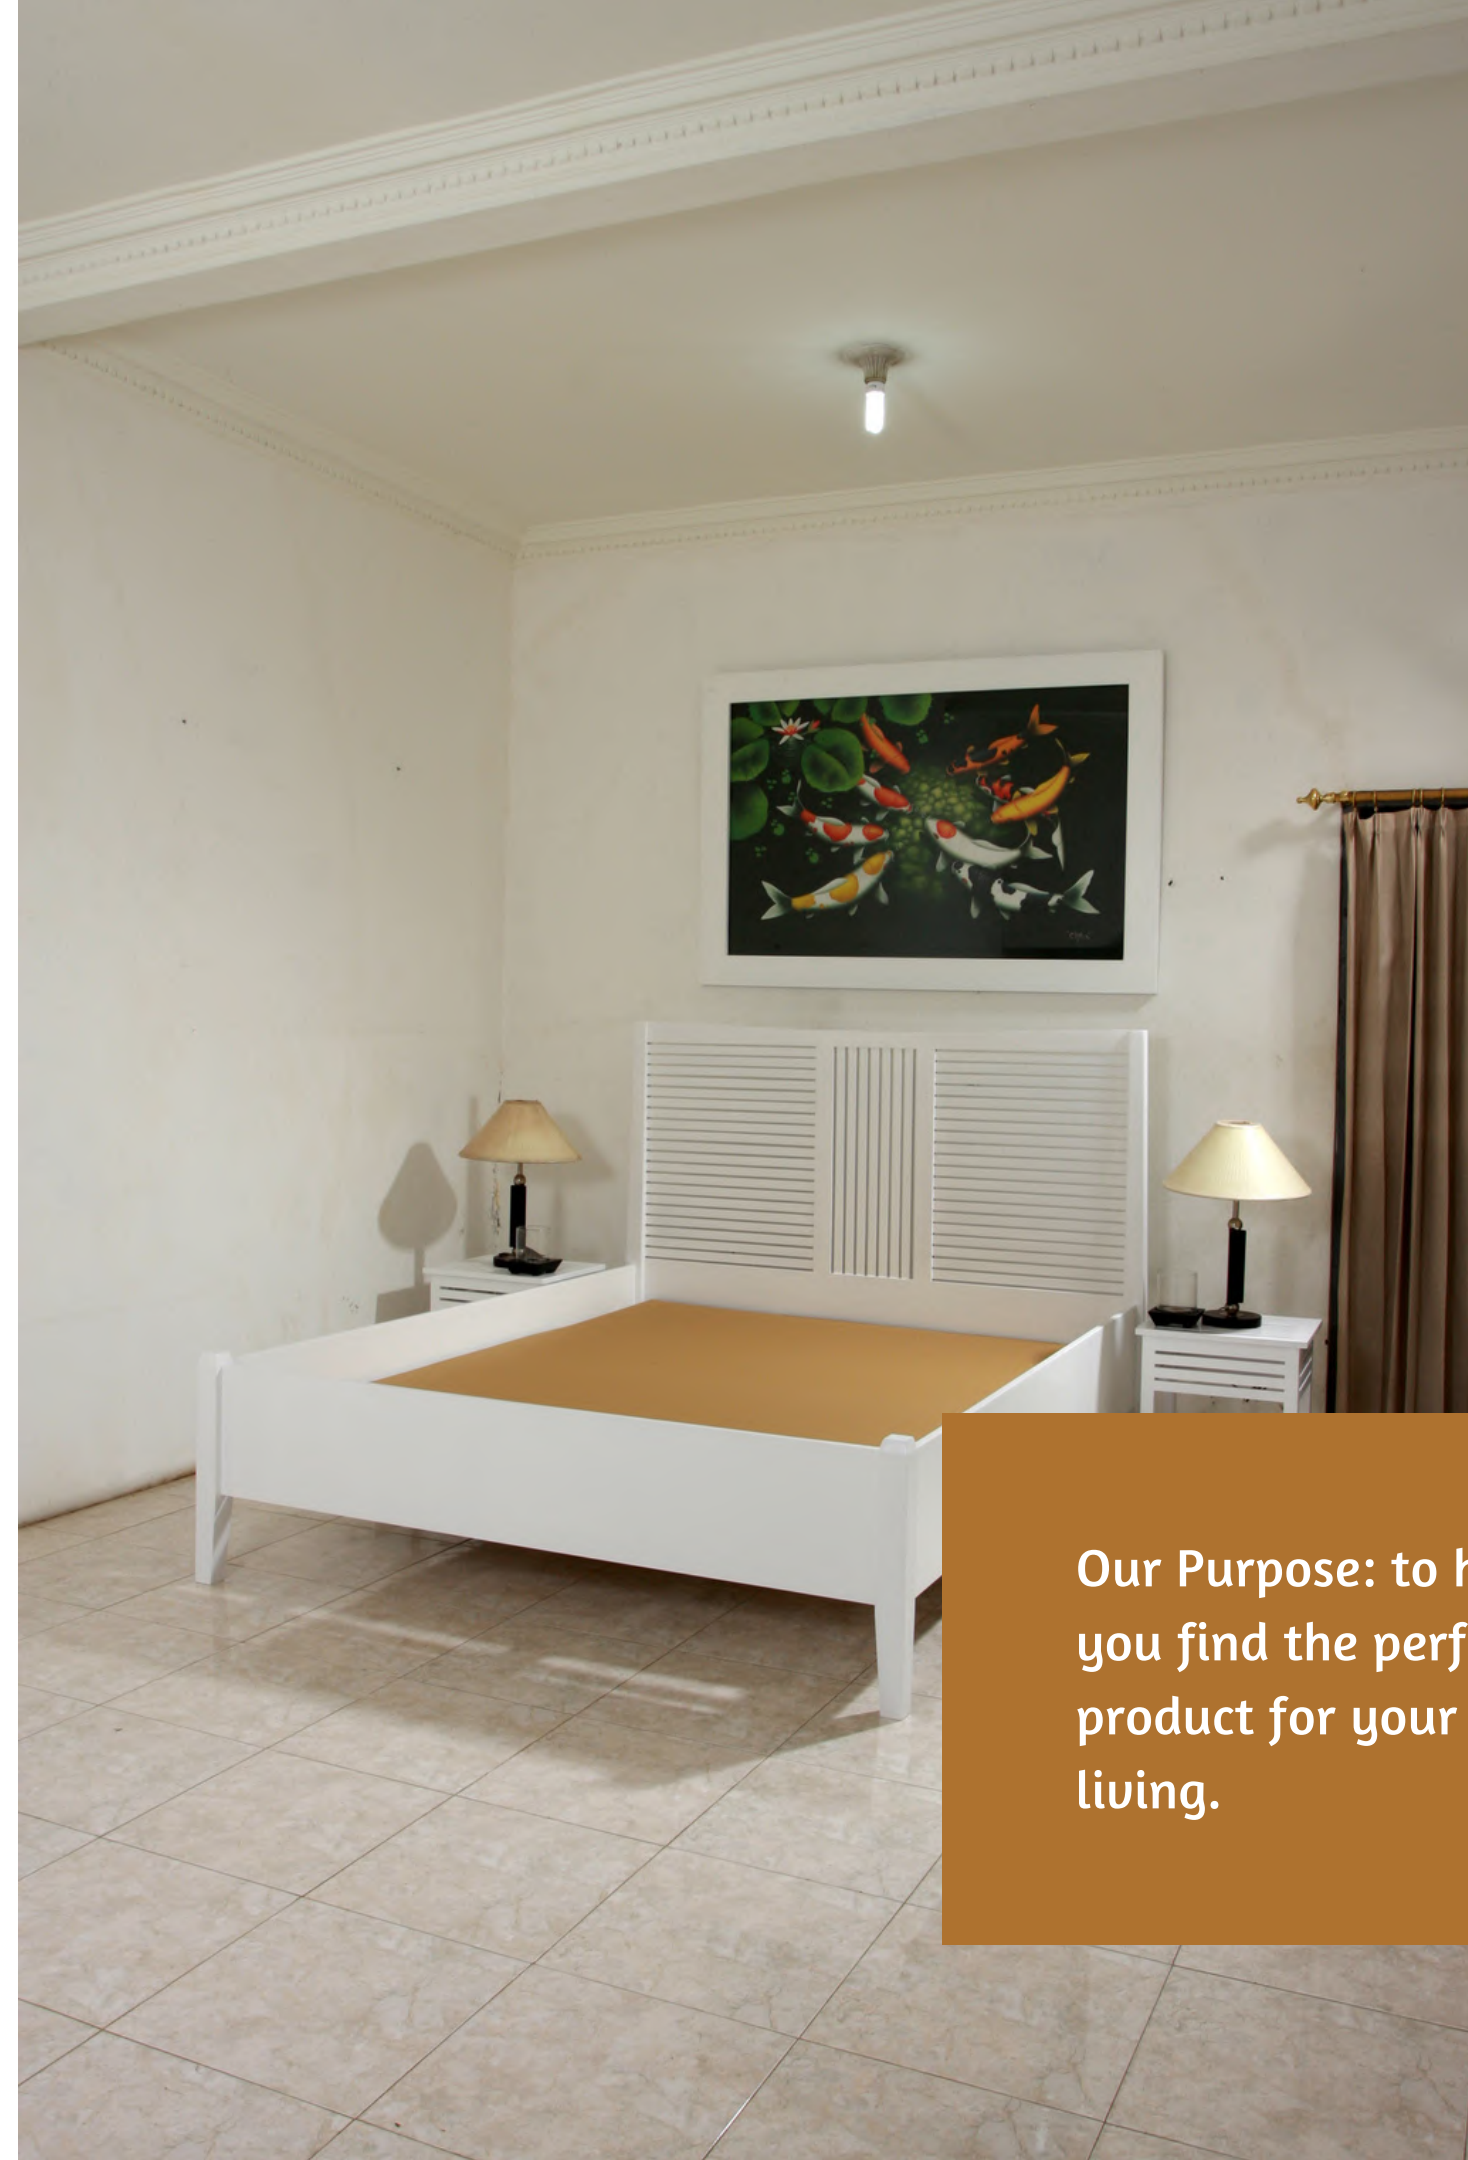

In the future we will continue to improve the quality of production with technology, as well as research so that it can be effective and efficient.

Vision and Commitment

We were established to provide quality products that can provide satisfaction to you with the support of production facilities and experienced employees. And committed to 'responsibility to society and the environment' as one of our main goals, and this has never been more relevant than today using only legal wood materials.

Our Purpose: to help you find the perfect product for your living.

Our Factory

To create affordable and quality products we use the support of various types of machines.
